

ARCHITECTURAL CANOPY SYSTEM

HANGER ROD SUPPORTED

DCI Signs & Awnings introduces our **METRODECK** Architectural Canopy System available for a wide range of applications.

DESIGNED FOR STYLE & FUNCTIONALITY, our hanger rod supported canopies are made from all aluminum extrusions & welded construction. The various deck styles, fascia profiles and hanger rod configurations allow YOU the ability to design a canopy system that will complement YOUR design requirements.

Our finishes include, but not limited to Kynar 500, Duranar, Tiger Drylac, Valspar & Polyurethane wet applications. All finishes meet AAMA 2604-10.

The **METRODECK** hanger rod canopy system is pre-engineered and will provide the needed load requirements for your project.
